WX64 [X] Datah Bilang		

Requirements

X-Plane 11.35 or greater

OpenSceneryX <http://www.opensceneryx.com/>

Installation

Unzip the individual downloads and place the folder in your X-Plane Custom Scenery Folder.

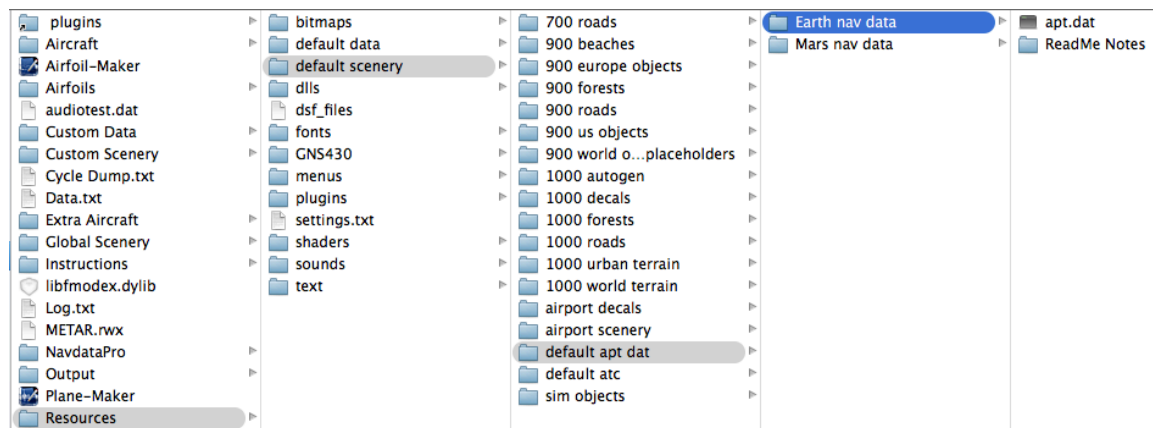

IMPORTANT - Airport Code Conflict

The listed airports all have had ICAO Code changes. At the time of release the default APT.DAT file in X-Plane has not been updated. You will need to update this yourself otherwise you will see the old default airport with the newer updated contained in this package.

How to change the APT.DAT file

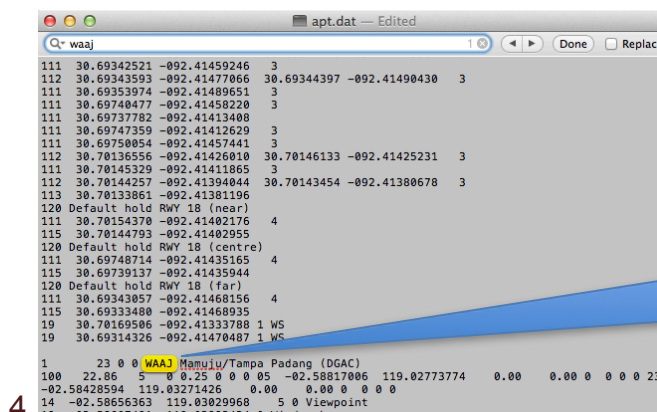

1. Locate the default APT.DAT file:

Resources (folder) → default scenery → default apt dat → Earth nav data → apt.dat (file)

2. Open the apt.dat in a text editor such as TextEdit (Mac).

3. Find/Search the file for the old code listed below and once found, change it to the new code.

Example:
change WAAJ to
WAWJ

4.

When finished changing all the code from the old to the new, save the file.
