MisterX Library <https://forums.x-plane.org/index.php?/files/file/28167-misterx-library-and-static-aircraft-extension/>  
OpenSceneryX <https://www.opensceneryx.com>  
ruscenery <http://ruscenery.x-air.ru>

### Plugins

[Autogate Plugin](#): Activates the Docking Guidance System (DGS) (by Marginal)  
[Ground Traffic Plugin](#): Nothing required – it just works (by Marginal)

## Installation

1. Place the unzipped Scenery package in your custom scenery folder of X-Plane.
2. Ensure you have the listed third-party object libraries listed above in your Custom Scenery Folder. They can be found on the Xplane.org master List of Libraries: <https://forums.x-plane.org/index.php?/forums/topic/90776-master-list-of-libraries/>
3. Download the [Autogate Plugin](#) (by Marginal) and install into your Plugins Folder [X-Plane ###/Resources/plugins]

## Acknowledgements

Igor Shlyakhta for the original request for UATE

Marginal - GroundTraffic animated ground vehicle traffic kit/Autogate Plug-in

## Important

This package as a whole or it's contents individually can only be offered and distributed freely and is not to be used in part or fully in any commercially distributed software.
