

Derived from the original MSFS freeware package authored by Dhuha Lathief

Modified for X-Plane and posted with Mr. Lathief's permission on X-Plane.org by Daveduck.

This package may not be redistributed in any manner without the express written permission of Dhuha Lathief. To contact him, see the original documentation included in this package.

INSTALLATION

Place the folder named "WADD Bali" (the folder containing this Read_Me) into your Custom Scenery folder.

To see OpenScenery X objects, download OpenScenery X and make sure that it is also present in your Custom Scenery folder. Get it here: <http://www.opensceneryx.com>

While OpenScenery X is not required to use WADD Bali, it does enhance the experience.

ABOUT WADD

Ngurah Rai International Airport, also known as Denpasar International Airport, is located in southern Bali, 13 km south of Denpasar, the provincial capital. It is named after I Gusti Ngurah Rai, an Indonesian National Hero who died in a puputan (fight to the death) against the Dutch at Marga during the Indonesian Revolution in 1946. Ngurah Rai is Indonesia's third-busiest international airport, after Jakarta's Soekarno-Hatta International Airport and Surabaya's Juanda International Airport.

The domestic terminal is located in the old building, while the international terminal is located in the L-shaped terminal. The airport has 17 gates: 3 in the domestic terminal, and 14 in the international terminal. Eight of the international gates have aerobridges. The domestic terminal has 35 check-in counters and 2 baggage carousels.

- * Domestic Arrival and Departure Terminal Area: 9.039 m²
- * International Arrival and Departure Terminal Area: 28.630 m²
- * The parking area is 38.358 m².
- * The total terminal area is 265.60 Ha.
